$(S, \circ)$  • je binarna operacija na S

namesto  $\circ(a,b)$  pišemo  $a \circ b$   
 $S \times S \rightarrow S$

$\mathbb{Z}$  z operacijima sestavljanja in množenja

$A \subseteq \mathbb{Z}$  je zaprta za operacijo  $\circ$  če  
 $a, b \in A \Rightarrow a \circ b \in A$

$$|S| = n$$

Koliko je binarnih operacija

$$n^{nn} = n^{n^2}$$

- je asociativna če

$$\forall a, b, c \in S. (a \cdot b) \cdot c = a \cdot (b \cdot c)$$

Pokazi da  $a_1 \cdot \dots \cdot a_n$  neodvisen od oklepajev

V splošnem: indukcija

$$\text{Vemo } (ab) \cdot c = a(b \cdot c) \text{ za } n=3$$

Treba dokazati za  $3 \leq k \leq n$  faktorjev

$n \geq 4$

Poglejmo si zadjo uporabo operacije

$$\underbrace{(a_1 \cdot \dots \cdot a_l)}_{\substack{\text{postavljeno} \\ \text{oklepaji} \\ \text{nato}}} \cdot \underbrace{(a_{l+1} \cdot \dots \cdot a_n)}_{\substack{\text{postavljeno} \\ \text{oklepaji nato}}}$$

$$1 \leq l \leq n-1$$

Rečimo da je  $(a_1 \cdot \dots \cdot a_l)$  oblikovan v  $a_1(a_2(\dots \cdot a_l)))$  in tudi drugačno oblikovan.

$$\underline{\underline{(a_1(\dots a_l))}} \underline{\underline{(a_{l+1}(a_{l+2} \cdot \dots \cdot a_n))}} =$$

$$a_1 \cdot (a_2(a_3 \cdot \dots \cdot a_n))$$

Polgrupa je množica z asociativno binarna operacijo  $(S, \cdot)$

Monoid je polgrupa z enoto

$$1 \cdot s = s \cdot 1 = s \quad \forall s \in S$$

(enota mora biti obojestranska)

Element  $t \in S$  je lev: inverz za  $s$ , če  
drži  $t \cdot s = 1$

če je  $l$  lev: inverz za  $S$  in  
 $r$  desn: inverz za  $s$  sta enake

$$ls = 1 = sr$$

$$l = l \cdot 1 = l \cdot (s \cdot r) = (l \cdot s) \cdot r = 1 \cdot r = r$$

Posledice: če ima s inverz, potem je  
inverz en sam

Naj bo  $S$  končen monoid

Predpostavimo da je  $s \in S$  obrnljiv z leve

Dokaži da je  $S$  obrnljiv

Vemo:  $f s = 1$  za nek  $t \in S$

$s^0, s, s^2, s^3, \dots$  v tem zaporedju so ponavljanja

$$s^n = s^{n+m} \quad m \geq 1$$

$$t^2 \cdot s^2 = t \cdot \underbrace{t \cdot s}_s = t s = 1$$

$$\forall n. \quad t^n s^n = 1$$

$$t^n s^n = 1$$

$$t^n s^{n+m} = 1$$

$$(t^n \cdot s^n) \cdot s^m = 1$$

$$1 \cdot s^m = 1$$

$$s^m = 1$$

$$s \cdot (s^{m-1}) = 1$$

$s^{m-1}$  je desni inverz

Navedi prime monoide  $\mathbb{S}$  in  
elemente  $SES$ , k-ima lev: inverz, nema  
pa desnege

Navedi vrednost u razloženje lva: ~~inverz~~ inverz

Oznacimo  $\mathcal{F}(X) = \{f: X \rightarrow X\}$

$$b) x \cdot y \cdot f = f \cdot xy = 1$$

Pratipomer

$$g: n \mapsto 2n \quad f \circ g = id$$

$$f: 2n \mapsto n$$

$$2n+1 \mapsto 0$$

Grupa ( $G, \cdot$ ) je

1. monoid (asociativnost, enota)

2.  $\forall g \in G \exists g^{-1} \in G. g \cdot g^{-1} = g^{-1} \cdot g = 1$

$G$  grupa,  $a, b \in G$
